FEEL IT

Denon's Urban Raver AH-C101 In-Ear Headphones deliver the deep but controlled bass experience the latest music genres demand from a small form factor, thanks to Denon's Air Compression Driver™ technology. Each earpiece features two 11mm drivers, mounted in parallel, to give an intense low frequency experience. Denon's mini control wheel allows for easy control of your Apple® iPod®, iPhone® and iPad™, while an integrated microphone on the earpiece provides clear sound quality for your phone conversations.

SOUNDS LIKE YOU

Tuned for Accentuated Bass Performance

Think new genres of music fall flat on a pair of conventional headphones? We think you're right. That's why we created Urban Raver headphones.

Let's face it, contemporary formats of music like techno, trance, hip-hop, drum 'n bass, etc. demand a different type of tuning to deliver the level of performance that you heard at the club last night. Getting explosive bass performance and slightly enhanced treble (so you can hear the subtle rhythms of the high hat) is important for the overall experience.

Denon's 11.5mm dynamic drivers professionally tuned for accentuated bass

Denon engineers have incorporated 11.5mm drivers in each ear piece and professionally tuned these to provide an accentuated bass experience. But we didn't stop there – we know that you want your bass to thump but your cable vibrations to be inaudible, so we implemented a radial cascade damper system to keep cable vibrations to a minimum, allowing for better detail. High-grade neodymium magnets are also used in the speakers to improve the dynamics and efficiency. Finally the speaker drivers are mounted in our proprietary Hybrid Metal Housing, which combines the precision machines aluminum alloy and a sophisticated resin compound. These materials dramatically reduce earpiece resonance and improve sound detail and balance.

DENON AUDIO APP

Denon Audio App, available for iPhone, iPad, or Android phones enhances the listening experience by providing:

- High quality audio player with instant playlist creation capability
- Ability to create, save and share custom EQ curves with an integrated 100-band equalizer
- Choose from myriad EQ presets
- Update your Facebook or Twitter status about the music you like with a touch of a button

FITS LIKE YOU

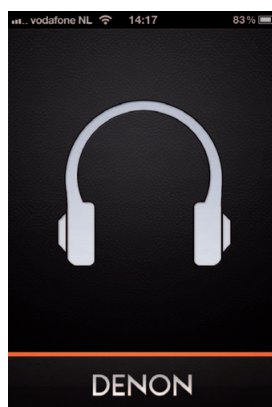

Feel the music. Not your headphones

At Denon we believe you should feel the music, not your headphones. In a quest to provide the most comfortable, best fitting headphones, Denon's engineers have studied over 4,000 pairs of ears from people around the world, to come up with a design that automatically accounts for the subtle differences in ear placement, ear canal size, head size and jaw depression. We know that fit and comfort comes from paying attention to the small details. Denon's Urban Raver AH-C101 In-Ear headphones come with a multitude of ear tips to choose from so you can get the right custom fit. Choose from Comply™ Foam TX-400M ear tips or Silicon Ear Tips (S, M, L). A diminutive carrying case is also included for extreme portability.

MOVES LIKE YOU

Stay in Communication & control, with an elegantly designed In-Line Remote and Microphone

Listening to your music from your smartphone? Most people on the go nowadays do. And we know that you probably want to take a call or two as you're on the go. That's why we've included an in-line remote & microphone is incorporated for easy control of your Apple® iPod®, iPhone® or iPad™ and placed slightly higher on the cable towards your mouth than conventional models for enhanced call clarity. If your weapon of choice is an Android, the microphone allows you to conduct phone calls with ease, and controls may work depending upon the model you have....we do wish Android had a standard for control, but we do understand their philosophy of providing an open platform. Whichever source you choose, you can be assured you'll get great sound quality with these headphones.
