

2160 - JANUS

TECHNICAL SHEET

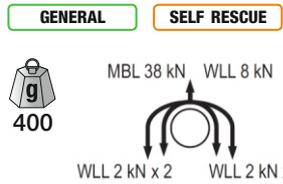

A high strength multifunctional double pulley for block-and-tackle systems and complex operations.

Features large wheels, a main attachment hole that accommodates three carabiners with two secondary holes on the sides, and a large becket. For ropes up to 16 mm. Prusik minding, the self-locking knot can be installed on both sides of both wheels. Self-lubricated bushings are perfect for light applications at low speed.

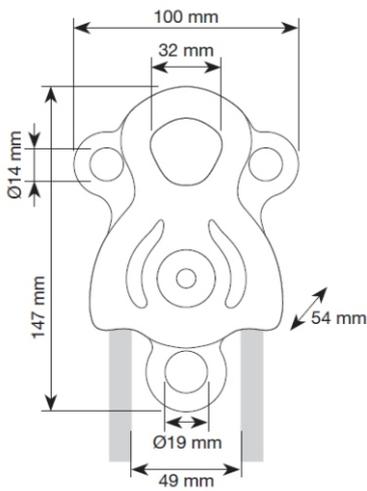

Efficiency: 90%.

Aluminum alloy body and wheels, stainless steel axle.

CE EN 12278
