

HEOS Super Link QUICK START GUIDE

BEFORE YOU BEGIN

HEOS Super Link is designed to offer HEOS multi room sound system by connecting with external multi-channel amplifier.

Make sure you have the following items in working order:

STEP 1: UNPACK

Carefully unpack your new HEOS Super Link.

Verify that the following items are included in the box.

Rack mount
brackets

Power cords

Ethernet cable

STEP 2: PLACE

Place the HEOS Super Link at a convenient location near the external multi-channel amplifier.

- 1 Rack mount the HEOS Super Link using the included rack ears or...

- 2 Place the HEOS Super Link on a sturdy shelf.

STEP 3: CONNECT

- 1 Connect the HEOS Super Link to an available input on your amplifier.

- 3 Connect the power cord.

choose proper power cord in your region

- 2 Connect the included Ethernet cable between the HEOS Super Link and your router.

- 4 Turn on the power switch.

STEP 4: CONTROL

- 1 Download the HEOS App.
Go to the Apple App Store, Google Play or Amazon Appstore and search for “HEOS” to download and install.

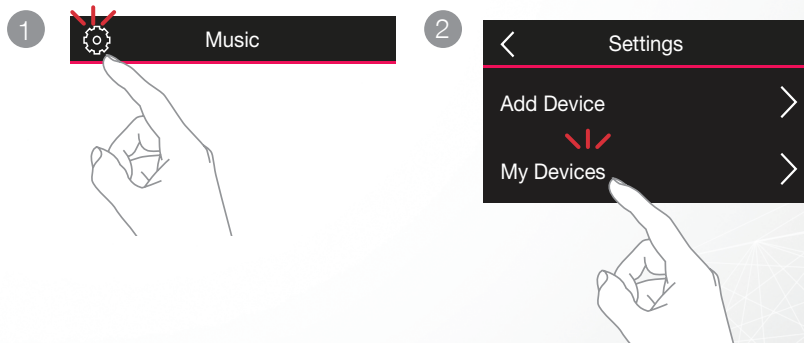

- 2 Launch the HEOS App
and follow the instructions in the app to complete the setup and configuration of the HEOS Super Link.

STEP 5: CONFIGURE

The HEOS Super Link will appear on the Rooms Tab. Go to *Settings/My Devices* to edit the default settings of your HEOS Super Link.

ENJOY!

Music cuts out or delays sometimes

- Make sure your Internet connection is operating correctly.
- If you are sharing your network with other users or devices, they may be using most of your bandwidth (especially if they are streaming video).

I hear a delay when using the AUX input with my TV

- If you are connecting the AUX input with your cable or satellite box for enjoying TV audio through multiple HEOS devices, you may hear a delay between when you see someone speak and when you hear the audio. This is because the HEOS system must buffer the audio before it sends it out to the devices so that it arrives at all speakers at the same time.
- You can avoid this delay by listening only to the HEOS device which is directly connected to the set top box.

Resetting Your Device

Resetting your HEOS device will clear out EQ, and name but retain it's current software. You will have to use Settings->Add Device to reconnect the device to your home network before it can be used. To reset your HEOS Super Link, press the Reset button on the back and hold it in until the Zone LED begins to flash amber.

Restoring the Device to Factory Defaults

Restoring the HEOS device to its factory defaults will clear all of the settings and restore the original software which was installed at the factory.

Caution: All settings will be erased and the software will likely be downgraded!

To restore your HEOS Super Link to the factory defaults, turn the power switch off rear panel. Press the Reset button on the back, turn the power switch on rear panel, and hold it in until the Zone LED begins to flash amber.
